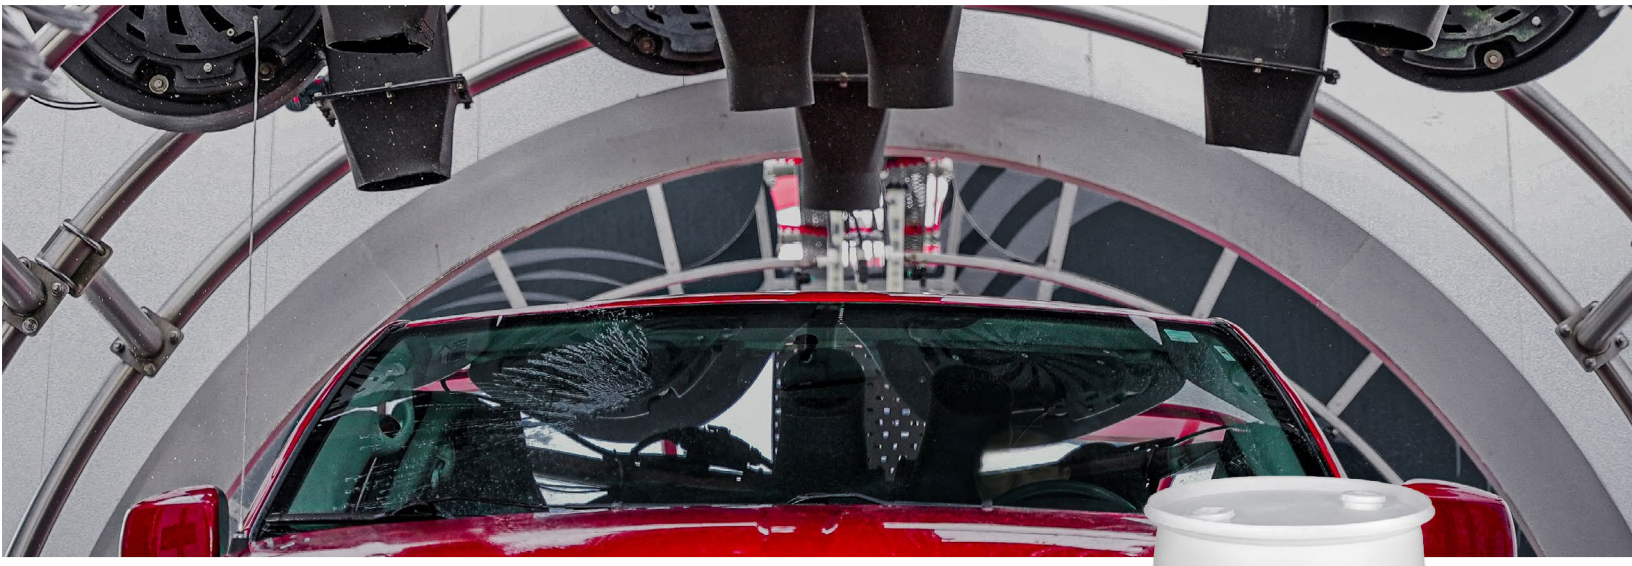
Tommy Classic Drying Aid

Technical Data Sheet



Tommy Classic Drying Aid is a drying agent that accelerates the rinsing process, allowing dryers to easily remove water from the vehicle in the blower room.

Features:

- Easily breaks down excess soap and water before blower room
- Superior water shedding capabilities for an impactful drying experience
- Dries without creating spots

Directions for use:

- Target a dilution of 1:154-228 or 8-12mLs/car
- Adjust settings as necessary until water is properly breaking and beading up on vehicle surfaces as they enter into the blower room

This product contains polymers that assist in breaking down foam and soap, aiding in the water beading and shedding process so blowers can easily dry the vehicle streak- and spot-free at the end of the wash.
